# Ultra Flood Light T500 Series

**SPORTS FIELD**

**38.39 kWh/m<sup>2</sup>a**  
Annual energy requirements of lighting

 A large, industrial-grade highbay light fixture is shown hanging from a ceiling in a factory or warehouse. The fixture is black with a prominent ring at the top for suspension and a large, cylindrical body with a ribbed design. The background shows the structural steel beams and other lights of the facility.
 

**Cold Forging**

“ Thanks for cold forging technology, our Polestar series highbay light has better heat dissipation, lower temperature and better lumen maintenance. The thermal conductivity gets 226W/m.k, while die-cast is only 96W/m.k. ”

 Three small inset images in the bottom right corner of the dark panel show different views of the highbay light fixture: a top-down view of the heat sink, a side view showing the suspension mechanism, and a close-up of the LED array.
